User Story:
1. As a reader, I want the application to work in both portrait and landscape orientation, so that I can choose the way I view material

Acceptance Criteria:
1. I should be able to view the screen in portrait mode
2. I should be able to view the screen in landscape mode

Acceptance Tests:
Given the user uses the system as a reader when I switch on the rotate mode then my mobile screen should rotate automatically to either portrait or landscape mode according to my choice

User Story:
2. As a reader, I want any pictures associated with the content to appear with the text, so that they can supplement the reading material

Acceptance Criteria
1. I should be able to view the picture
2. I should be able to see the associated content appear with that picture

Acceptance Test
Given the reader views the content when he/she attempts to read a book, then he/she views the pictures associated with the content

User Story:
3. As a reader, I want to be able to adjust font size, so that it is easier to read

Acceptance Criteria
1. I should be able to adjust font size according to my requirements
2. I should be able to view the content according to the adjusted font size

Acceptance Test:
Given the reader adjusts the font when he/she feels a need to view the content in a bigger/smaller font then the font size gets adjusted according to that set by the user

User Story
4. As a reader, I want to be able to connect with a remote user, so that I know if I have access to someone with whom I can read

Acceptance Criteria:
1. I should be able to connect with the remote user by sending a request
2. I should be able to read with the connected remote user

Acceptance Test
Given the reader requests connection with a remote user when he/she connects with a remote user then he/she must be able to read the content together with the remote user

User Story:
5. As a reader, I want to read with a connected reader using audio, so that we can read together

Acceptance Criteria:
1. I should be able to connect with the audio
2. The remote user's voice should reach me as well as my voice should reach the remote user

Acceptance Test:
Given the reader clicks on the option to connect with audio when he gets connected to remote user with audio, then they can hear each other's voices and can discuss upon the content
